•Ant Migration Tool
•MuleSoft

OBJECTIVE STATEMENT

Salesforce Developer with over 2 years of hands-on expertise in designing, developing, and implementing customized solutions on the Salesforce platform. Adept at translating business requirements into scalable and efficient technical solutions, with a strong focus on delivering value to clients. Proven track record of collaborating with cross-functional teams and optimizing Salesforce environments for enhanced productivity and user experience.

EXPERIENCE

MAXSYS TECHNOLOGY | Salesforce Developer
Apr 2022 - Present | Remote
Information Technology Support Services.

- **Streamlined** the Salesforce.com platform by utilizing complex **Apex** Programming to reduce workflow process time by 35%.
- Developed custom Salesforce applications, incorporating **Apex Classes, Triggers, Lightning Web Components** and Visualforce pages to address specific business needs, contributing to a 25% increase in overall operational efficiency.
- Spearheaded the **implementation** of Salesforce.com Development and Administration procedures, enhancing system efficiency by 40%.
- Increased data accuracy by 30% by leveraging Apex Data Loader for bulk import and export of data.
- Implemented a robust **RESTful API**, leading to a 50% improvement in integration with external systems.

MAXSYS TECHNOLOGY | Salesforce Developer Intern
Nov 2021 – Mar 2022 | Chennai, Hybrid

- Customized the Salesforce environment by developing **custom objects, fields and page layouts** to align with customer requirements.
- Implemented robust Salesforce security measures, including **Profiles, Permission Sets, Field-level Security and Sharing Rules**, leading to significant improvements in data protection and security compliance.
- Established and maintained automation processes using **Workflow Rules, Process Builder and Flow** to optimize and streamline various business processes.
- Worked on data migration projects, including data cleansing and validation.

PROJECTS

LEAVE TRACKER APP
2022
https://github.com/aimran4801/Leave-Tracker-App

- Utilized Lightning Web Components(LWC) for a modern and user-friendly interface.
- Employed Apex and triggers for server-side logic and automation.
- Streamlined leave request management and approval processes.
